

Homework Zero
Physics & Mathematics of Sustainable Energy
College of the Atlantic
Due Friday, September 13, 2019

This is a small warm-up assignment. The main goal is for you to start getting used to the Edfinity system. You can access Edfinity here: <https://edfinity.com/>. There is also a link to WeBWorK on the top of the schedule page on the course website. The assignment to do is called Homework00.

If you encounter any problems with Edfinity, please let me know.

You will get an invitation to join Edfinity via email, or you can click on this link: <https://edfinity.com/join/9TFHWDNH>.

If you set up an edfinity account but then decide to drop the course, please delete your account. This will save the school a few dollars. Thanks.

Most assignments will combine Edfinity and written work, to be submitted on actual paper in my mailbox, but this warm-up assignment is all online.
