Billing Terminology

kWh (kilowatt hour)

The amount of electricity you use is measured in kilowatt hours (kWh) by a meter. For example, a 100-watt light bulb used for 10 hours will consume 1,000 Watt hours, or one kWh.

Estimated Bill

If we are unable to obtain a scheduled meter reading, your bill will be estimated based on the amount of kWh consumed based on past usage.

Sales Tax Exceptions

Maine state sales tax does not apply for the first 750 kilowatt hours (kWh) of residential usage.

Late Payment

The amount not paid by the Due Date on the bill will be subject to a late payment fee of 0.949% on the unpaid balance.

For further definitions on your energy bill terms, please visit us online at:

<https://www.versantpower.com/accounts-services/understanding-your-bill>

Payment Arrangement

If you have trouble paying your bill, a payment arrangement may help. Please call customer service for more information.

Delivery Rates

Maine's rates are approved by the Maine Public Utilities Commission. Copies of our rate schedules are available online at [versantpower.com](https://www.versantpower.com).

Distribution

This recovers the costs of the local system - including poles, wires, and substations - used for delivery of power from the bulk grid system to your home or business.

Transmission

This recovers the costs of the high-voltage system that transports bulk power.

Supplier Message Standard Offer

Your electricity price for Standard Offer service for the period of January 1, 2026 through December 31, 2026 is \$0.129540 per kWh.

About Your Energy Supply

You're on Standard Offer. Did you know you can choose your Energy Supplier? Versant Power does not supply energy, but provides billing & payment services on behalf of your electricity supplier.

Stranded Costs - Volumetric

These include all remaining costs from electric industry restructuring in 2000, including power purchase agreements, Maine Yankee, and other costs. For some non-residential customers, these also include the variable component of the public policy charge.

Public Policy Charge - Fixed

This is a fixed charge that recovers certain costs of programs required by state policy, including the net energy billing program, low-income assistance programs, and more recent long-term power purchase agreements.

Conservation

Efficiency Maine Trust was created by the Legislature to deliver energy efficiency programs and services. It is funded in part by Conservation, a fee on electricity use.

Net Energy Billing Terminology

Net Energy Billing

Net Energy Billing credits are earned when a renewable energy source, such as wind or solar, produces excess electricity that was not used at the time of generation. Credits can be in units of kilowatt-hours or in dollars, depending on the net energy billing program.

Credits Generated

Generated credits are the total amount of credits earned from your own excess renewable energy generation, such as solar panels on your roof, during this billing period.

Credits Distributed

Distributed credits are credits that have been allocated to a customer account based on the contract agreement. These could be distributed from a community solar program or from an individual's renewable energy system.

Credits Received

Received credits are new credits that are made available on your account during the current billing period. These could have been distributed from a renewable energy generator to you or could be from your own renewable generation.

Credits Applied this Period

This refers to the amount of credits applied to the bill during a specific billing period.

Credits Expired

Credits expire on a rolling basis twelve months after they are earned. Once a credit expires, it is no longer available to be applied to the bill.

Net Change in Credits

Your net change is the difference between incoming credits and outgoing, used, and expired credits for this billing period.

Credit Closing Balance

Refers to the amount of credits you have remaining in your bank and that are available to use.

Your Supply Service

Your electricity is provided by suppliers licensed by the Maine Public Utilities Commission for electric energy and capacity. Customers can choose their supplier. For information on available electricity suppliers, selecting a supplier, or current rates, visit www.maine.gov/meopa
